

SACS STOCK MASTER

SACS Stock Master for Sage Line 50.

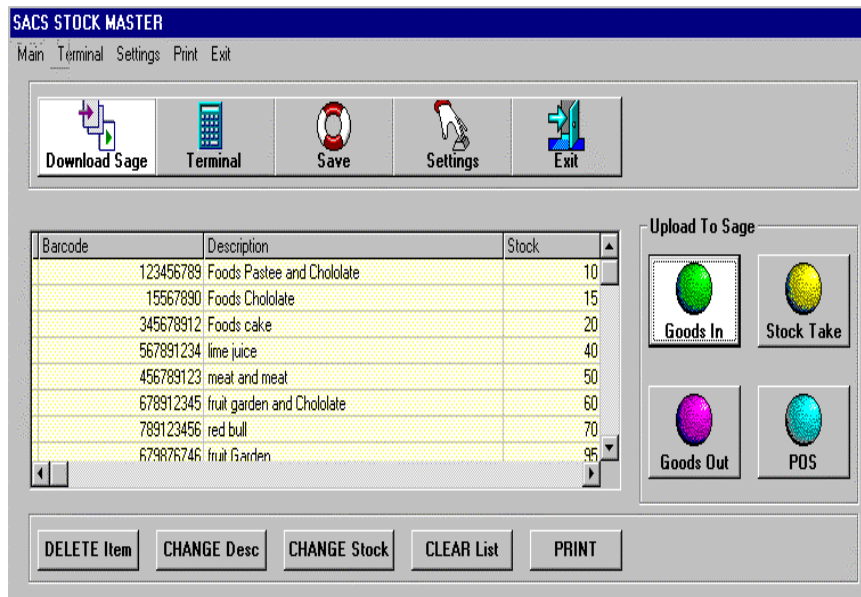

Introducing M90 & PT630 Remote data capture Terminals direct link to Sage Line 50.

SACS Stock Master utilises a range of reliable Data Capture Terminals to capture bar-code representation of the Sage Line 50 Product Code. Capturing data in bar code form using a M90 or PT630 PDE unit is often an ideal solution.

The windows based interface software displays all product codes, descriptions, and Sales prices along with the current quantity in stock. This information can be sorted in ascending or descending order.

The software allows you to create and send your own static data to the portable computer, together with any look up tables required for data verification. The application templates can be configured to meet most common data collection requirements such as goods in, goods out, stock take and mobile point of sale. Also the software allows transferring the data direct to sage line 50.

Barcode	Description	Stock
123456789	Foods Pastee and Chololate	10
15567890	Foods Chololate	15
345678912	Foods cake	20
567891234	lime juice	40
456789123	meat and meat	50
678912345	fruit garden and Chololate	60
789123456	red bull	70
679R76746	fruit Garden	95

Windows 32 bit application.

Easy to use and Value for money.

Links directly with SAGE Line 50 V8, V9 & V10.

Captured data can be edited before update to sage Line 50 on the terminal or on the PC.

Four applications can be loaded on to the terminal simultaneously.

User security accesses level management.

Remote data capture made easy.
